

NILA Forest Residence

Antaranya Forest Residences

Plot Area: 15,000 sqft
Villa Size: 1,000 – 1,500 sqft
Configurations: 2BHK · 3BHK

Stillness — Compact forest residence designed around calm living

Design Philosophy

Architecture Designed Around Stillness

NILA is designed as a quiet forest retreat where architecture remains restrained and nature dominates the experience. The villa emphasizes stillness, openness, natural light, and indoor-outdoor transitions.

Large openings frame the surrounding landscape while warm natural materials create a soft and calming atmosphere throughout the residence. Every space is intentionally designed to feel intimate, breathable, and deeply connected to the forest.

The experience prioritizes quiet luxury over excess, allowing simplicity, proportion, texture, and light to define the character of the home.
