

VANYA Forest Residence

Antaranya Forest Residences

Plot Area: 20,000 sqft
Villa Size: 1,500 – 2,200 sqft
Configurations: 2BHK · 3BHK · 4BHK

Openness — A hospitality-inspired residence designed for immersive living within nature

Design Philosophy

Architecture Open to the Forest

VANYA is designed as an immersive forest experience where architecture embraces openness, volume, and dramatic connection to the surrounding landscape. The residence is shaped by light, air, and the seamless flow between inside and outside.

Elevated pools, generous terraces, and double-height living spaces create a sense of expansiveness rarely found in forest living. Every element is calibrated to heighten the experience of nature without overwhelming it.

VANYA is a home for those who want to feel deeply within nature — not just adjacent to it. Its hospitality-inspired design brings warmth, movement, and a spirit of shared living to the forest edge.
